

Advanced Certified Scrum Product Owner®

Description

On our interactive Scrum Alliance Advanced Certified Scrum Product Owner® course you'll consider the more global aspects of product ownership – how to navigate a complex product development landscape, how to apply lean principles, and what aspects of your personal growth to focus on. This will involve learning a range of advanced tools in areas such as working with stakeholders, facilitation, collaboration techniques, scaling, advanced product validation, and advanced product backlog management.

The workshop includes interactive exercises, real-life examples, and lively discussion. It will push you, challenge you, and get you thinking. But the most effective learning, the kind that permanently changes you, happens when you apply techniques and knowledge and reflect on your results, as such, following the workshop you'll have access to an online coaching sessions in which you can reflect on how you are applying your knowledge and skills.

Why this course?

- Deepen your knowledge of the Product Owner role within Scrum - the most popular Agile framework and continue your agile training journey
- Become a Scrum Alliance Advanced Certified Scrum Product Owner®
- Gain the best Advanced Scrum Product Owner certification and the most recognised and in demand certification from employers and recruiters
- Take a significant step in your agile journey to Certified Scrum Professional® and agile coaching certification of Certified Team or Enterprise Coach

What you'll come away with

After successfully completing the course, you will be designated as an Advanced Certified Scrum Product Owner®. This Scrum Alliance certification includes a two-year membership of the Scrum Alliance.

You will be equipped to operate effectively in a more Agile product-based organisation – driven by product outcomes and metrics, supported by results driven approaches, and informed by insights into human based biases and behaviours.

You'll be able to:

- Use effective techniques to collaborate as a member of a cross-functional Scrum Team
- Use techniques to identify your key stakeholders
- Use a range of techniques for engaging with stakeholders
- Recognise when to act as a facilitator for stakeholders
- Apply group facilitation techniques
- Identify when a group is engaged in divergent thinking or convergent thinking
- Discuss the impact of different technical practices on maximising business value
- Understand different scaling frameworks and approaches
- Identify purpose or strategy to foster alignment and shared ownership
- Plan a product release based on content from a roadmap, market segmentation or window
- Connect teams directly to customers and users to build deeper understanding and empathy
- Visualise and communicate product and feature ideas and assumptions
- Incorporate testing assumptions into the Scrum framework
- Develop hypotheses for a given target user/customer segment
- Maximise outcome and impact to the business, user, and market whilst minimising output for a product/feature idea
- Use different techniques to model and measure value
- Use at least four factors to order a product backlog, and different techniques to structure its contents

What the course includes?

- High quality instruction from our Certified Scrum Trainers and Certified Agile Coaches with many years experience of training Scrum and very importantly implementing Scrum in the real world
- Course materials and, for virtual courses, access to the BeLiminal Learning Management System and online content created during the course
- Advanced Certified Scrum Product Owner® on successful completion
- 2 years' membership of the Scrum Alliance worth \$100
- One hour coaching session post course worth £125
- Membership of our BeLiminal alumni community where you can receive help and support from the BeLiminal coaches and fellow alumni
- Access to exclusive resources
