

Certified LeSS Basics

What is this course?

The Certified LeSS Basics course (CLB) is a brief introduction into the LeSS Framework. Large-Scale Scrum (LeSS) is a framework for scaling agile development to multiple teams.

LeSS builds on top of the Scrum principles such as empiricism, cross-functional self-managing teams and provides a framework for applying that at scale. It provides simple structural rules and guidelines on how to adopt Scrum in large product development.

The Certified LeSS Basics course provides a 1-day (Classroom) or 2 half-days (Live Online) overview of the framework and some of the essential concepts that it uses. It will help to determine whether LeSS is for you and/or your organisation or not. The Certified LeSS Basics course is also for anyone who is involved in a LeSS effort.
