

## CERTIFIED AGILE SCALING PRACTITIONER (CASP 1)

### Description

The Certified Agile Scaling Practitioner (CASP 1) course is part of Beliminal's Agile Coaching Academy; dive into the realm of agile scaling with our course, tailored for organisational leaders, managers, and change agents aiming to enhance agile scaling results. This course prepares you to navigate and implement strategic agile scaling across enterprises, ensuring agility's benefits are maximised organisation-wide.

### What about exams and certifications?

Upon successful completion, participants will receive a **Scrum Alliance Certified Agile Scaling Practitioner** certificate. This Scrum Alliance certification includes a two-year membership in the Scrum Alliance.

### What are the prerequisites for this course?

**No specific prerequisites are required**, making it accessible to anyone interested in learning about agile scaling, regardless of their previous experience with agile practices.

### Who is this course suitable for?

This course is designed **for managers, executives, agilists**, and anyone **involved in or interested in the scaling process** within their organisation. Whether you're driving change, supporting it, or looking to learn about scalable agile delivery, this course is for you.

### What you'll come away with

Once completed this course, you'll possess the knowledge to align scaling efforts with enterprise strategy, understand the principles behind successful agile scaling, and apply scalable agile product development practices for sustainable transformation.

You'll also join the world's largest community of agilists, connecting with peers and experts.

You'll be able to:

- Understand the different approaches to scaling and their pros and cons
- Find sources of patterns, evaluate them and apply them to your context
- Discern patterns from anti-patterns and why avoiding the latter is important
- Identify the problems that arise from scaling agile beyond a single team and techniques to prioritise them
- Identify when temporary structures and patterns are useful and how to manage expectations from stakeholders
- Succeed with the necessary change management involved in scaling agile
- Analyse organisational structures to create a scaling challenges backlog
