

CERTIFIED SCRUM PROFESSIONAL® - PRODUCT OWNER (CSP-PO®)

Description

On our interactive Scrum Alliance Certified Scrum Professional® - Product Owner course you'll learn more about the deeper elements of effective product ownership focusing you on the next level of your development - understanding how to navigate the product as a business, how to understand and navigate complex product development in context of agile ways of working as well as strengthening your skills, tools and techniques as you grow.

This will involve learning a range of advanced tools in areas such as working with customers and stakeholders, propositions, collaboration techniques, product backlog management and validation.

The workshop includes interactive exercises, real-life examples, and lively discussion. It will push you, challenge you, and get you thinking. But the most effective learning, the kind that permanently changes you, happens when you apply techniques and knowledge and reflect on your results, as such, following the workshop you'll have access to online coaching sessions in which you can reflect on how you are applying your knowledge and skills.

Why this course?

- **Deepen your knowledge** of how to become an even better product owner through wider organisational context and business acumen and business agility
- Become a **Scrum Alliance Certified Scrum Professional® - Product Owner**
- Gain the **best next level Scrum Professional - Product Owner** accreditation to complete the triad of certifications being one of the **most recognised and in demand** from employers and recruiters
- Take a **significant step** in your agile journey to Certified Team Coach® or Certified Enterprise Coach®
